Initial Model Training Code, Model Validation and Evaluation Report

The initial model training code will be showcased in the future through a screenshot. The model validation and evaluation report will include classification reports, accuracy, and confusion matrices for multiple models, presented through respective screenshots.

Initial Model Training Code:

```
[ ] from sklearn.linear_model import LinearRegression
```

```
[ ] model=LinearRegression()
```

```
▶ model.fit(x_train,y_train)
```

```
↳ LinearRegression
